

APPENDIX B TBD Resolution Matrix

| TBD Number | Resolution |
|------------|---|
| TBD1 | The Space Station document that defines the HRDL packet or bitstream data is being updated by the program. When the correct document has been identified, it will be placed in the specification. |
| TBD2 | Will define the Attached Payload Data and Resource connectors at CDR. Awaiting further definition by the Program. |
| TBD3 | In the process of locating the appropriate UOF specification that defines Payload Commanding Data and Telemetry Data formats. |
| TBD4 | In the process of locating the appropriate PDSS specification that defines the Payload Commanding Data and Telemetry Data formats. |
| TBD5 | Cooling resources for PRCU equipment will be quantified after completion of the Facilitization Trade Study. |
| TBD6 | PRCU Physical characteristics will be quantified after completion of the Facilitization Trade Study. |
| TBD7 | Environmental conditions will be quantified after completion of the Facilitization Trade Study. |
| TBD8 | Transportability will be quantified after completion of the Facilitization Trade Study when the decision is made on how the PRCU will be packaged and delivered (Trailer vs. User Facility). |
| TBD9 | The Electromagnetic Radiation requirements will remain TBD until CDR. |
| TBD10 | Installation/Removal requirements will remain TBD until the completion of the Facilitization Trade Study. |
| TBD11 | Requirement for user facilities and facility equipment will be quantified after completion of the Facilitization Trade Study. |
| TBD12 | Personnel & Training will remain TBD until CDR when the maintenance documentation is completed. |
| TBD13 | Voltage increments for Interface B will remain TBD until the number is baselined in SSP-52000 the Pressurized Payload IDD. |
| TBD14 | Voltage Increments for Interface C will remain TBD until the number is baselined in |

APPENDIX B TBD Resolution Matrix

| TBD Number | Resolution |
|------------|------------|
|------------|------------|

| | |
|-------|---|
| | SSP-52000, the Pressurized Payload IDD. |
| TBD15 | Session analysis tools will be TBD until CDR |
| TBD16 | The Preparation for Delivery section will be quantified after completion of the Facilitization Trade Study. |
